**Section 1194.21 Software Applications and Operating Systems – Detail**

**VPAT™**

## Voluntary Product Accessibility Template<sup>®</sup>

<i>Criteria</i>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Supports	ACEIT fully supports keyboard access. All product functions are executable from the keyboard, through menus, shortcut keys, tabbing, etc.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Supports	ACEIT does not disrupt or disable any accessibility features of the operating system or other applications.
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Supports	ACEIT uses standard windows and third party components for all interactive interface elements. The Spread third party component indicates that they support section 508 in their own VPAT.
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be	Supports	ACEIT buttons with images have corresponding text or tooltips to indicate their identity and operation. Elements with state such as checkboxes are standard windows controls.

available in text.		
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Supports	ACEIT utilizes consistent images.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Supports	ACEIT utilizes standard windows function for displaying and editing text. On the Spread control, text can edited by pressing "F2" to access the standard text control.
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Supports	ACEIT supports system color settings as identified by the user in the display properties.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Not Applicable	ACEIT does not display animations.
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Supports	Color is never used as the exclusive means of conveying information. There are some areas where color provides additional cues only as a secondary method and never for essential information.
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Supports	ACEIT allows the user to select some color settings using standard windows color selections.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Not Applicable	ACEIT does not use flashing or blinking objects, text, or other elements.

(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supports	Fields and functions on electronic forms are accessible to Assistive Technology.

## **Section 1194.31 Functional Performance**

### **Criteria – Detail**

## **VPAT™**

## **Voluntary Product Accessibility Template®**

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Supports through Equivalent Facilitation	ACEIT supports screen readers to narrate the contents of the screen. Certain features may require the user to enter the cell's edit mode by pressing F2 to read the contents.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Supports	ACEIT supports the operating system large fonts setting, and the primary user interface has a zoom level as well as configurable default font.

<p>(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided</p>	<p>Not Applicable</p>	<p>ACEIT does not require any user hearing.</p>
<p>(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.</p>	<p>Not Applicable</p>	<p>ACEIT does not produce any audio information.</p>
<p>(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.</p>	<p>Not Applicable</p>	<p>ACEIT does not require user speech.</p>
<p>(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.</p>	<p>Not Applicable</p>	<p>ACEIT does not require any fine motor control, simultaneous actions. ACEIT can be operated with limited reach and strength. .</p>
