

Do you understand ^{ALL} the costs of your project?

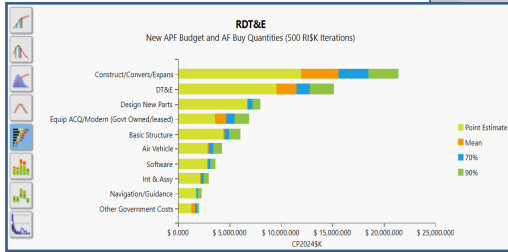

ACEIT is a cost-estimating suite consisting of ACE, CO\$TAT, POST, and JACS offering full program life cycle support. It is the premier tool for analyzing, developing, sharing, and reporting cost estimates, providing a framework to standardize the estimating process.

Not a black-box estimator but rather robust model-building tools for developing consistently high-quality cost estimates **with uncertainty**.

ACEIT 8.2 Released Now Including

- Adopt New Inflation & Escalation Terminology
- Automate Model Transition Process (7x-8.2)
- Label Indices Selection & Usage Clearly
- Facilitate New Cost Method Data Entry
- Enhance Reports for All Cost Types
