

[Much anticipated ACEIT 8.0 released: Faster Results, Custom Charts, Modular Interface!](#)

Automated Cost Estimating Integrated Tools (ACEIT) version 8.0 Released!

Online PR News - 18-June-2019 - The Automated Cost Estimating Integrated Tools (ACEIT) is the premier cost estimating software suite used across government and industry programs to analyze, develop, share, and report on cost estimates. ACEIT's suite of integrated applications automates cost analysis: from developing methodologies in CO\$TAT, to creating estimates in ACE, to publishing reports and presentations in POST. The Joint Analysis of Cost and Schedule (JACS) tool in ACEIT provides cost and schedule uncertainty insights for management. ACEIT is a complete suite of analysis tools.

Tecolote Research is pleased to announce the release of ACEIT 8.0. ACEIT 8.0 delivers a next-generation approach to perform advanced data analysis.

- ? Faster results through improved calculation process
- ? Easier model creation via new WBS explorer & input forms
- ? New input visualization to see RI\$K and Phasing methods
- ? Expanded charts & reports with more customization

"With this new version, we further strengthen our ability to support program managers, cost estimators, and financial analysts during all program life-cycle phases. ACEIT 8.0 delivers customers a next-generation solution for estimating, analyzing, and reporting their estimates," said Melissa Cyrulik, ACEIT Program Manager at Tecolote Research.
