February 2015

ACEIT 7.4b Release planned for April 2015. The release includes the highly anticipated JACS for P6. It will provide our robust analytics capability and integrated cost and schedule uncertainty to organizations using P6. The program can tie in directly to your enterprise database, to PPM, or run on stand-alone XER files – providing capability to save the JACS inputs into the native file and database formats.

JACS 7.4b also provides new options in Project and P6 for applying duration uncertainty to statused schedules, new key model inputs report, GAO best practices report, fully-integrated help, and major enhancements to JACS Insight.
