Mark your calendars! 2nd Annual ACEIT User Conference, 14-16 January 2008.

ACEIT Update: ACEIT 7.1 to be Released

We are pleased to announce the upcoming release of ACEIT 7.1. Currently the release is scheduled for December 2007. Below are a few of the major enhancements that will be included in this new release:

ACE

- Flexible (user defined) point estimate interpretation for uncertainty distributions
- Dramatically improved and expanded advanced risk specification form
- Ability to define custom risk CDFs (including discrete) and share them across sessions
- Enhanced lead/lag capability
- Increased max equation length to 500 chars (from 250), including DEC's
- New phasing methods to mimic FYTrapz() functionality of ramp up, steady state, ramp down
- New Session Analyzer tool that recommends "best practices"
- Enhanced error log and it stays open while you fix the errors!
- Easier navigation to what if case overrides in the IRV (ACE and POST)

POST

- Tornado, Spider and Variance Analysis charts
- Pareto chart, rank orders selected WBS level results from largest to smallest
- Time-phased Delta report, shows yearly changes between multiple what if cases
- Budget information on charts, shows how budget tracks with estimate

CO\$TAT

- New Filter capability to easily exclude data points
- Prediction Interval (PI) for non-linear CERs (and now able to pass selected PI to ACE)

Plug-ins

- ACE to ACE
- Excel to ACE

Look for 7.1 in your mailbox in December! Don't miss this year's User Conference for an overview and real world examples on how to exploit the new features in this version of ACEIT.

ACEIT Announcement: ACEIT Sales and Training have Moved

The ACEIT Sales and Training operation has moved from Santa Barbara, CA to Houston, TX. The new Tecolote office in Houston will now handle all aspects of ACEIT Sales and Training.
