

JULY 2023 | ISSUE 163

ACEIT eNews

This month the ACEIT 8.1-001 Hotfix Release and current training offerings.

ACEIT 8.1-001 Hotfix Release Available!

The latest version of ACEIT 8.1 (build 91.5) is now available for download on [ACEIT.com!](https://www.aceit.com)

The 8.1-001 Hotfix release addresses known issues, including:

- POST doesn't recognize .acem Summary Sections or Summary Result Types
- ACE row cut + paste results in documentation lost in certain scenarios
- Custom Tables in the ACEIT Librarian were being deleted after editing other tables

ACEIT 8.1.91.0 is available for download in two different ways:

- The [full production install](#) includes all features present in ACEIT 8.1 Production Release as well as fixes for additional issues.
- The [hotfix.exe](#) includes only the hotfix files and can only be installed on machines that already have the full production install of ACEIT 8.1.91.0. (**NOTE:** If you do not have ACEIT 8.1.91.0 and want to install the update, use the full production install instead of the hotfix.exe.)

A full list of resolved issues can be found in the Hotfix Release Notes, available on the download pages.

Please contact ACEIT_Support@Tecalote.com with any questions.

ACEIT Training

Training Spotlight
