

Effective Communication of Results is as Important as the Estimate Itself

The Program Office Support Tool (POST) is an Excel-based reporting and what-if management application for ACE Sessions. POST enables users not familiar with ACE to run excursions and report ACE estimates from within Microsoft Excel, using encrypted ACE sessions (if desired).

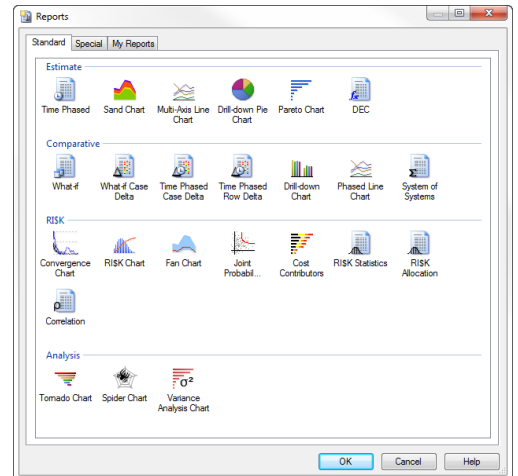

POST is an easy to use tool that simplifies the generation, analysis, and reporting of ACE estimates.

- ✓ Conduct an unlimited number of estimate what-if cases
- ✓ Graphically drill-down through estimates to identify cost drivers
- ✓ Compare deltas between cost estimate cases
- ✓ Generate charts and tables for comprehensive reporting of the estimate
- ✓ Populate PowerPoint presentations and Word documents

POST Key Features:

- Access ACE sessions via a simple interface and in a secure manner
- Create what-ifs/excursions
 - Compare and combine cases and sessions
- Powerful report generation
 - Tabular
 - Graphical
 - Estimate
 - Comparative
 - RISK
 - Analysis
- Automated creation and update of Power Point presentations and MS Word documents
- Utilities for file management and administration

Features

Availability

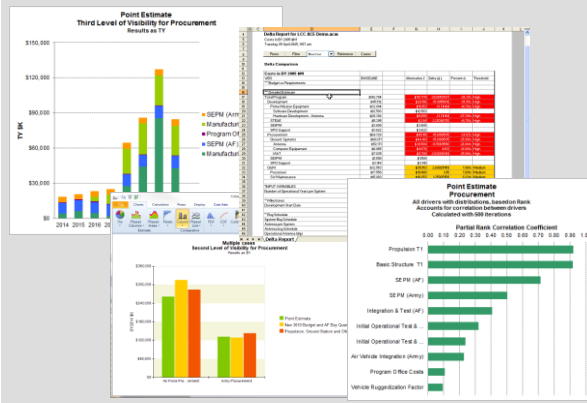

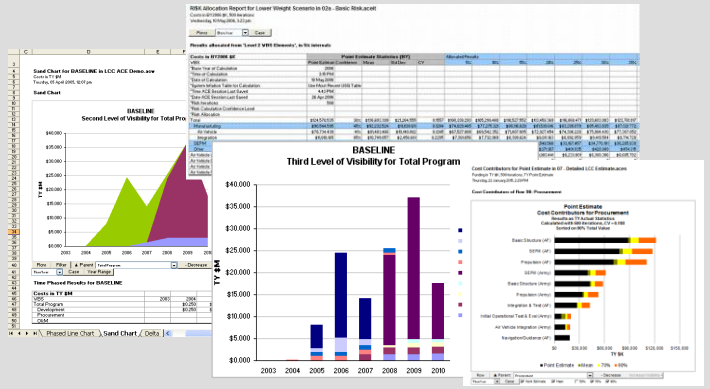

ACEIT is a U.S. Government funded product available through Tecolote Research, Inc.

Licensing

The ACEIT Government Program Office has tasked Tecolote Research to recoup a fair share of the ACEIT distribution, maintenance and support (DMS) costs from each U.S. Government ACEIT site. An annual DMS fee entitles U.S. Government organizations and their support contractors to ACEIT distribution and technical support. All other agencies and companies have to purchase an ACEIT software license.

Efficient Reporting Capability

View estimate costs by WBS or create summary reports for any desired category (appropriation, CLIN, contractor, etc). View total or yearly costs, in tabular or graphic form. Powerful tools to update source information.

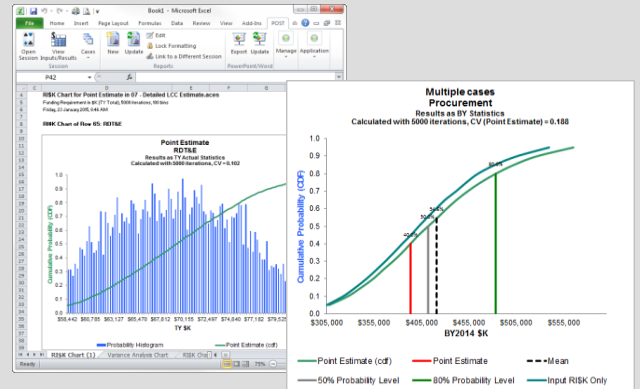

Compare Estimates and Identify Cost Drivers

View multiple scenarios side by side, by total or by year. Graphic charts give a quick visual to easily identify costly items. Drill-down charts allow row by row comparison of estimates.

Interactive Risk Reports and Charts

View risk results for entire estimate by confidence level in tabular report form or view information graphically by WBS element. "S-curves" can be viewed as a histogram or as a cumulative distribution with various user selected confidence levels marked.

Create and Automatically Update Presentations

All POST reports can be exported to Power Point via a simple-to-use Export Wizard. They can be quickly updated when the ACE session or POST reports change. POST can find and update all images exported to PowerPoint or Word, preserving location and size.
