Business	Financial Management	Business	Desktop	

Description:

Automated Cost Estimating Integrated Tools (ACEIT) 8.x consists of a family of applications that support Program Managers and cost/financial Analysts with developing Life Cycle Cost Estimates (LCCEs) during all phases of acquisition I and II programs. ACEIT 8.x suite includes Automated Cost Estimator (ACE), and these main Microsoft Excel add-in applications CO\$TAT, Program Office Support Tool (POST), Joint Cost and Schedule Analysis (JACS), and Librarian. ACE is the estimating portion and heart of the ACEIT application suite. ACE is a model-building tool for Analysts to develop and calculate cost estimates. ACE integrates with RI\$K which is a simulation-based uncertainty analysis capability feature used to perform cost, schedule, and technical risk and uncertainty analysis. CO\$TAT is the statistical analysis feature of the ACEIT application suite that allows users to navigate through the analysis process to develop estimating relationships such as cost and price analysis and include the analysis directly into the final cost estimate. POST provides new inputs to an existing ACE session, execute the underlying ACE session on these inputs, view ACE output results, and create reports in XML-based file containing all the calculated results for a what-if cases assessed. The Librarian automatically builds and maintains methodology libraries containing analogies, factors, equations, rules, and references.

ACEIT 8.x is installed on a current Secure Host Baseline-Army (SHB-A) build workstation. The user accesses the application from the shortcut in the Windows Start menu or from the desktop icon. The user manually enters data into the application via keyboard and mouse. Data is saved on the local hard or shared drive, and data stays internal to the local enclave.

Facts:

- This is an upgrade to Certificate 201722262.

CoN Link: https://portal.army.mil/apps/networthiness/_layouts/NetcomCON/rqstcon2.aspx?requestId=49743

Restrictions:

1. ACEIT 8.x is restricted for use within assessed and authorized networks and/or data centers having a current ATO.

POC: netcom.hq.networthiness@mail.mil /(520)538-1199

This Certificate of Networthiness is based on a trusted standardized platform, configured per FDCC. All patches and updates will be provided by the host network administrator (NEC or DECC) in accordance with all technical directives, mandates, and IAVM. This Certificate of Networthiness is no longer valid should the assessed configuration be significantly altered. Per Army Cyber Command guidance, all operating environment will implement HBSS capabilities. Upon expiration of this Certificate of Networthiness, this application must be reassessed to ensure it is still compliant with the GNEC architecture and is still neteworthy. Should this software version be upgraded prior to this expiration, the new version must be evaluated for networthiness.
