New Knowledge Base Articles on ACEIT Librarian: Temporary Import Workspace and Shared Libraries

The ACEIT Knowledge Base on ACEIT.com provides a resource of help articles, guides, tutorials, and expert insights on ACEIT. We recently added two new articles providing additional information on ACEIT 8.3.

ACEIT Librarian Temporary Import Workspace

The ACEIT 8.3 overhaul of ACEIT Librarian application introduced a Temporary Import Workspace to the software. This new section allows analysts to review data before importing it into their library. This article explores the purpose of the Temporary Import Workspace and discusses how to utilize it in your analytical process.

ACEIT Librarian Shared Libraries

The shared libraries feature in ACEIT Librarian allows teams to connect to, reference, and update the same set of inflation/escalation and currency exchange data to ensure that your group is estimating with the same information. While not required, nor a replacement to the existing Organization table update process, shared libraries can be helpful in specific use cases such as commodity-specific inflation/escalation indices and centrally used currency exchange rates. This article walks through how to set up and connect your team to a shared library.

ACEIT Working Group Membership

The ACEIT Working Group (AWG) is a *government-only* community of ACEIT power users and stakeholders with a goal of helping set the course for ACEIT's future

development. The AWG is comprised of 1-2 representatives from each site and meets biannually. Members see previews of requirements definition and design, understand our planned schedule, participate in user surveys and test events.

If you are a government employee with a .civ, .mil, or .gov account and are interested in representing your site, please apply for membership through your aceit.com Subscriber Dashboard. If approved, you will be invited to future meetings and granted access to the ACEIT Working Group Portal which contains past and present AWG meeting materials, user surveys, and announcements.
